

Majesty. The insurgents have transmitted their power to Georgy, and he has made an unconditional surrender to the Russians, and that his example will be followed.

Some say Georgy has proved a traitor and been bribed.

The submission of the Hungarians and the important fact of the termination of the war, had no effect on the transactions in public securities in London.—The English securities fluctuated but slightly.

Dates from Havana to the 29th ult., have been received at Mobile, brought by the steamer Severn. Letters in appear the Delta stating that a great excitement prevails throughout the Island of Cuba. The Captain General has called out a force of 4000 men, and large bodies of troops have been sent to Principe, Trinidad and St. Jago, which towns, it was rumored, were in a state of insurrection.

The English Consul had written to Jamaica to send more ships for the protection of British property.

The Captain General had forbid the delivery of New Orleans papers thro' the Post Office.

The letters say nothing of the insurrectionary movements. They attribute the military demonstrations to the reception of the Proclamation of the President of the United States, and fears of an expedition against Cuba being on foot.

PRESERVING SUMMER FRUITS.—Such fruits as Strawberries, Raspberries, Blackberries, and the like may be preserved in the following manner, cheaply, and their flavor be retained: Put sugar over the fire at the rate of half a pound to the pound of berries, add a little water and when hot take up the fruit in a skimmer and dip it into the sugar, holding it there for half a minute perhaps, then take it out and spread it on tins. Go through the whole lot in this manner. Then boil down the sugar to a thick syrup and pour it over the fruit. Set the tins either in the sun or in a warm oven till the berries are dried through in thin gelatinous cakes. When thoroughly dry, put the cakes in a bag and hang it up out of the way. The cakes will keep as long as wanted, and may be fitted for the table in a few minutes, by the addition of a little hot water more sugar being added if necessary. The beauty of this mode is that the flavor of the fruit is retained, while there is no danger of its spoiling by fermentation. Fruits, when preserved in the usual way—pound for pound—are made too sweet, and lose their distinctive flavor so much that it differs little whether it is a preserved peach or potato. Besides, without care, preserves are apt to ferment and spoil.—*Southern Cultivator.*
